## ACKNOWLEDGEMENTS

The secondary physical education program has benefited from the assistance and expertise of many individuals. Alberta Education acknowledges with thanks the contributions of the following:

### AD HOC SECONDARY PHYSICAL EDUCATION VALIDATION FIELD TEST COMMITTEE

**Larry Beauchamp**, University of Alberta,  
Edmonton  
**Val Olekshy**, Edmonton Public School Board  
**Don Williams**, Calgary Public School Board

### AD HOC SECONDARY PHYSICAL EDUCATION LEARNING RESOURCES COMMITTEE

**Al Bloomfield**, Medicine Hat School District  
#76  
**Ed Carr**, Edmonton Separate School Board  
**Eamonn Rutledge**, Calgary Separate School  
Board  
**Heather Worton**, Calgary Public School Board

### AD HOC SECONDARY PHYSICAL EDUCATION CURRICULUM COMMITTEE

**Raynelle Anderson**, Banff School District #102  
**Larry Beauchamp**, University of Alberta,  
Edmonton  
**Merri-Ann Ford**, Faculty of Education,  
University of Lethbridge, Lethbridge  
**Larry George**, Edmonton Public School Board  
**Nelson McBride**, Sherwood Park RCSS District  
#105  
**Rob Pearn**, County of Lacombe #14  
**Joanne Susut**, County of Ponoka #3  
**Bill Wotherspoon**, Red Deer School District  
#104

### HEALTH AND PHYSICAL EDUCATION CURRICULUM COORDINATING COMMITTEE

**Andrea A. Borys**, University of Alberta,  
Edmonton  
**Pat Brand**, University of Alberta, Edmonton  
**Irene Bruzga**, Calgary Public School Board  
**Douglas Hemstreet**, Calgary Public School  
Board  
**Ed Henderson**, Lethbridge Public School Board  
**Harry Hohol**, Edmonton Public School Board  
**Tom Iannone**, East Smoky School Division #54  
**Pat Komanchuk**, Lethbridge Separate School  
Board  
**Kip Kurylo**, Hillside Community School,  
Grande Prairie  
**Colin Lumby**, University of Calgary, Calgary  
**Deborah A. Rowley**, Edmonton Separate  
School Board  
**Alvin Sehn**, Rocky Mountain School Division  
#15

The contributions of the following staff of Alberta Education to the work of the above committees are acknowledged with appreciation:

**Dan Cooney**, Red Deer Regional Office  
**Lynn Edwards**, Edmonton Regional Office  
**Glen Manyluk**, Red Deer Regional Office  
**Ken McKenna**, Calgary Regional Office  
**Valerie Perry**, Curriculum Design Branch

## ADMINISTRATION AND PRODUCTION

This program was developed within the Curriculum Design Branch, Alberta Education.

**Don Hepburn**, Acting Associate Director,  
1982-1983 (Health and Physical  
Education)

**Laura Mann**, Acting Associate Director,  
1983-1985 (Health and Physical  
Education)

**Jim Brackenbury**, Associate Director (Junior  
High)

**Garry Popowich**, Associate Director (Senior  
High)

**Ardis Kamra**, Learning Resources Officer

**Gina Vivone**, Curricular Assistant (Junior  
High)

**Jean Olynyk**, Curricular Assistant (Senior  
High)

Special recognition and appreciation is  
extended to:

Editing	Larry Beauchamp
Copy editing	Kim Blevins Lisa McCardle
Secretarial	Dianne Hohnstein Denise Hugman Esther Yong

# INTRODUCTION

## A. PROGRAM RATIONALE AND PHILOSOPHY

Alberta's secondary schooling process is comprised of a variety of subjects and experiences designed to help all students reach their fullest potential. While the unique contributions of physical education to the school program are motor skill development and physical fitness, physical education is concerned with the whole being and therefore consists of learning modes that are based upon the interrelated cognitive, affective, and psychomotor behaviours of students.

The physical education program, a vital part of the schooling process, features a student-centred learning environment that attempts to meet the needs of all students in order to encourage their optimal development. The program is designed for a wide range of student abilities and, therefore, is comprised of varying activities, progressions in difficulty, and standards of achievement.

Through the provision of knowledge about physical activity and the opportunity to develop physical, social and emotional skills, the physical education program is intended to foster self-initiated participation in physical activities and the formulation of a healthy lifestyle. The student-centred approach, which integrates all three learning domains, provides the opportunity for students to achieve a measure of success, and thereby to enhance their self-concept. In addition, the program has the potential to refine students' social skills in that many of the interaction skills, values, and attitudes promoted by physical activity are transferable to other areas of the students' lives.

A wide variety of learning experiences were carefully structured to meet individual differences in order to ensure that this physical education program has the potential to fulfil its purpose. That is, the program provides students, regardless of ability level, with experiences that encourage them to make wise personal decisions regarding lifelong participation in physical activity. This program can contribute to an active, healthy, and productive adulthood by providing students with the necessary knowledge, physical skills, social and emotional skills, and predisposition to develop and maintain physical fitness and positive attitudes toward lifelong participation in physical activity.

The student-centred philosophy permits adaptation to individual student needs and abilities, including physical and emotional differences. This objective is supported by the considerations provided in the curriculum guide, which are intended to assist teachers in accommodating adolescent male and female social, emotional and physical differences, and learning needs crucial to junior and senior high students' stages of cognitive development.

The rationale and philosophy for physical education in Alberta schools originates from The Goals of Basic Education, adopted by the Alberta Legislative Assembly in 1978, and The Goals of Secondary Education from the *Secondary Education in Alberta* policy statement of June 1985.

## B. GOALS AND LEARNER OUTCOMES OF SECONDARY PHYSICAL EDUCATION

### Goal 1

THE PHYSICAL EDUCATION PROGRAM SHOULD ASSIST THE STUDENT'S INDIVIDUAL DEVELOPMENT OF MOTOR SKILLS THAT ARE EFFECTIVE, EFFICIENT, AND APPLICABLE TO A WIDE VARIETY OF PHYSICAL ACTIVITIES.

### Learner Outcomes

To the extent of their own unique ability, students will develop:

1. locomotor, non-locomotor, and manipulative skills in a wide variety of physical activities suitable for developmental and recreational purposes; and
2. the ability to define, analyze and solve movement problems inherent in a wide variety of physical activities suitable for developmental and recreational purposes.

### **Goal 2**

THE PHYSICAL EDUCATION PROGRAM SHOULD ASSIST THE STUDENT TO DEVELOP, MONITOR, AND MAINTAIN AN APPROPRIATE, INDIVIDUAL FITNESS LEVEL.

### Learner Outcomes

To the extent of their own unique ability, students will develop:

1. the ability to participate in vigorous activity;
2. appropriate physical fitness in the areas of cardiorespiratory endurance, muscular endurance, strength, and flexibility; and
3. the ability to assess and monitor personal physical fitness needs and to design a safe program to meet these needs.

### **Goal 3**

THE PHYSICAL EDUCATION PROGRAM SHOULD ASSIST THE STUDENT TO UNDERSTAND CONCEPTS BASIC TO PHYSICAL MOVEMENT AND TO APPLY THESE UNDERSTANDINGS TO A VARIETY OF PHYSICAL ACTIVITIES.

### Learner Outcomes

To the extent of their own unique ability, students will develop:

1. physical skills, physical fitness, and understanding of scientific principles of movement and the relationship of exercise to personal well-being;
2. knowledge of rules, techniques, strategies, and mechanical, physiological and psychological concepts as they relate to various physical activities;
3. essential safety skills, practices, and techniques necessary in physical activity.

### **Goal 4**

THE PHYSICAL EDUCATION PROGRAM WILL ASSIST THE STUDENT TO DEVELOP POSITIVE PERSONAL ATTRIBUTES.

### Learner Outcomes

Students will develop:

1. a positive, realistic self-image, understanding and accepting themselves with their strengths and limitations;

2. a positive and responsible attitude toward and independence in pursuing a wide variety of desirable recreational habits, interests, and skills which will lead to wise and satisfying use of leisure time;
3. a sense of achievement, joy, pleasure and satisfaction in life through a variety of wholesome physical activities;
4. a sensitivity toward and an appreciation of the beauty of skilled movement;
5. appreciation of their own growth and development in social, emotional, ethical and physical areas.

## **Goal 5**

THE PHYSICAL EDUCATION PROGRAM WILL ASSIST THE STUDENTS TO DEVELOP POSITIVE INTERPERSONAL SKILLS TRANSFERABLE TO OTHER AREAS OF THEIR LIVES.

### Learner Outcomes

Students will develop:

1. appreciation of the worth of others, and respect for their rights;
2. consideration and understanding of the needs, strengths and limitations of others;
3. attitudes and skills of cooperation and conciliation essential to fair play, competition and team interaction, as well as to leadership and the ability to follow a leader;
4. an appreciation of and ability to act in accord with game etiquette and the values of loyalty, honesty, dependability, kindness and generosity.

## **C. CONTENT**

### **SECONDARY PHYSICAL EDUCATION PROGRAM MODEL**

The secondary physical education program is comprised of seven dimensions: aquatics, dance, fitness, games, gymnastics, individual activities and outdoor pursuits. By engaging in a balanced selection of activities drawn from each dimension at levels appropriate to each student's unique ability and aptitude, students will develop their physical skills, knowledge of physical movement, positive personal attributes, and interpersonal skills and attitudes. Confidence, respect for oneself and others, and a predisposition toward lifelong engagement in physical activity, with the attendant rewards of health, self-esteem and positive social relationships, are the long-term objectives of the physical education program.

#### **Program Balance**

A well-balanced program provides opportunities for students to participate in activities from all seven dimensions, appreciating local or individual considerations such as access to facilities, religious persuasion, or health. A balanced physical education program drawn from each of the seven dimensions will provide a broad and varied program of physical education.

Activity selection and time allocation will be determined by the needs and development of the students, by the program objectives, and by many other factors.

The balance may also differ from grade to grade, and from junior high to senior high school depending on such factors as individual needs, time and facilities.

#### APPLICATION OF SECONDARY PHYSICAL EDUCATION PROGRAM

The physical education program is intended to provide students in grades 7 through 10 with an opportunity to develop skills in a variety of physical activities at levels of proficiency reflective of each student's unique abilities. It is therefore mandatory that all seven dimensions of the program be addressed in the required component of each course in grades 7 through 10, notwithstanding the exemptions specified below.

Because of the greater proficiency of skills of most students who pursue the complementary 20 and 30 courses, the study of all seven dimensions is not required at the complementary level. However, the fitness dimension must be included in both Physical Education 20 and 30. The complementary physical education program should accommodate a variety of student needs, interests and abilities, and should aim at a balance of many dimensions rather than over-emphasis on one aspect of the program.

#### Required/Elective Components

Each dimension of the grade 7 through 10 physical education program must receive no less than 10% of the available instructional time at each grade level. The required component of 80% of the available instructional time therefore allows the remaining 10% to be used for extension of one or more dimensions. The 20% elective component can be applied to one or more of the dimensions for enrichment or remediation. This 20% is not an addendum to the required component but should be utilized throughout the duration of the course as indicated by student needs and interests.

At the grade 11 and 12 levels, 70% of the total instructional time should be devoted to the required component of the program, and 30% to the elective. The elective may be used to extend the required component, to address dimensions not incorporated into the required component, or to provide special emphases.

#### Exemptions

As an integral part of the well-balanced physical education program, each dimension utilizes carefully selected activities to contribute to the development of the physically educated individual. In the following specified circumstances, however, exemptions may be warranted:

## PROGRAM EXEMPTIONS

CATEGORY	CONDITIONS FOR EXEMPTION	PROCEDURES AND APPROVAL PROCESS	ALTERNATIVE EXPERIENCES
Individual	1. Religious beliefs	1. Statement in writing from parent to principal	<ul style="list-style-type: none"> <li>When exemption is granted, alternative activities consistent with the goals and objectives of the physical education program should be substituted where practicable.</li> </ul>
	2. Medical	2. Certification by medical officer with statement of activities to be avoided	
Class, grade, school	<ul style="list-style-type: none"> <li>Access to facilities</li> <li>Religious beliefs.</li> </ul>	<ul style="list-style-type: none"> <li>Initiated by board or parent</li> <li>Approved by the local school board or school governing authority</li> <li>Exemption shall be registered on the Secondary School Program Plan and approved by the Alberta Education Regional Office serving the area.</li> </ul>	

### Variable Credit Programming

Physical education at the senior high level permits variable credit programming and requires a demonstrated progression of learning between each of the senior high grades. Because the program accommodates a wide variation of student ability levels, students from all program routes should be able to participate successfully in Physical Education 10.

The choice to offer Physical Education 10, 20 or 30 for three, four or five credits is accommodated by placing the required minimum percentage of time per dimension (e.g., 10%) against a 75, 100 or 125 hour time frame. The emphasis on each dimension within the required component remains constant while the time and credit values vary.

### Complementary Secondary Physical Education Program

Physical Education 20-30 are complementary courses (i.e., optional) but may be used to fulfil additional credit requirements for the Advanced or General High School Diplomas. The prerequisite nature of the Physical Education 10-20-30 sequence requires increased complexity of physical, cognitive or affective demand and differentiated content at each successive grade level. Credits are awarded on the basis that the experience provided at each grade is differentiated from the previous grade and that performance expectations increase hierarchically. A logical and articulated transition in scope and sequence of content is also required. Dimensions included for additional study should contain some activities never before covered. Activities that were studied from grades 7 through 10 should be covered at a more sophisticated level.

Physical Education 20 will build upon the skills of students entering from grade 10, but will provide opportunity for further expansion and depth of learning. Physical Education 30 will be an extension, but not a duplication of the Physical Education 20 program. The articulated 10-20-30 program should culminate in Physical Education 30.

The program models for the core physical education program (grades 7 through 10), and the complementary physical education program (grades 11 and 12), are presented below.

### CORE PHYSICAL EDUCATION PROGRAM

PHYSICAL EDUCATION 7-10			
<u>REQUIRED*</u>	80%	<u>ELECTIVE</u>	20%
<ol style="list-style-type: none"> <li>1. Aquatics</li> <li>2. Dance</li> <li>3. Fitness</li> <li>4. Games A and B</li> <li>5. Gymnastics</li> <li>6. Individual Activities</li> <li>7. Outdoor Pursuits</li> </ol>		<p>The 20% elective time can be used for remediation or enrichment of the required program content.</p>	

\*No less than 10% of the instructional time must be allocated to each dimension in the required component of the grades 7 through 10 program. This allows 10% flexibility for extension of one or more dimension in the required component of the program.

### COMPLEMENTARY PHYSICAL EDUCATION PROGRAM

PHYSICAL EDUCATION 20			
<u>REQUIRED</u>	70%	<u>ELECTIVE</u>	30%
<ol style="list-style-type: none"> <li>1. Fitness</li> <li>2. A minimum of three other dimensions <ul style="list-style-type: none"> <li>● games</li> <li>● dance</li> <li>● aquatics</li> <li>● gymnastics</li> <li>● individual activities</li> <li>● outdoor pursuits</li> </ul> </li> </ol>		<ol style="list-style-type: none"> <li>1. The 30% elective time can be applied to an extension of the required component.</li> <li>2. The 30% elective time can be applied to one or more of the remaining dimensions not used to make up the 70% required component.</li> <li>3. Instruction may include special emphasis on such areas as: contemporary issues, officiating, leadership, history, sports medicine, anatomy, kinesiology, etc.</li> </ol>	

PHYSICAL EDUCATION 30			
<u>REQUIRED</u>	70%	<u>ELECTIVE</u>	30%
<ol style="list-style-type: none"> <li>1. Fitness</li> <li>2. A minimum of two other dimensions <ul style="list-style-type: none"> <li>● games</li> <li>● dance</li> <li>● aquatics</li> <li>● gymnastics</li> <li>● individual activities</li> <li>● outdoor pursuits</li> </ul> </li> </ol>		<ol style="list-style-type: none"> <li>1. The 30% elective time can be applied to an extension of the required component.</li> <li>2. The 30% elective time can be applied to one or more of the remaining dimensions not used to make up the 70% required component.</li> <li>3. Instruction may include special emphasis on such areas as: contemporary issues, officiating, leadership, history, sports medicine, anatomy, kinesiology, etc.</li> </ol>	

#### D. RESOURCES

A variety of learning resources has been identified for recommended and supplementary teacher reference for each of the seven dimensions. These are listed in Appendices A and B.

# PLANNING, TEACHING, AND EVALUATING

## A. GROWTH AND DEVELOPMENT CHARACTERISTICS

Physical education aims to contribute to the positive development of each student's unique physical, mental, and social needs. Although patterns of growth and development and general characteristics have been identified for each age grouping, physical educators must be cognizant of the varying rates of development and accepting of a wide range of task responses. These patterns and stages of development must be considered during program planning, and daily lessons must be flexible enough to accommodate individual differences. The wide range of activities specified within the seven dimensions of the program should provide sufficient choice for flexible programming that will accommodate the uniqueness of all students.

Growth and development characteristics have definite implications for planning the physical education program. The material that follows summarizes these characteristics and outlines program planning implications.<sup>1</sup>

### 1. Junior High

#### a) Physical Characteristics

- the majority of students will have reached puberty by the end of this period.
- the body undergoes rapid physical change and growth.
- gross motor coordination may be poor and students will appear awkward as they experience their "growth spurt".
- fine motor coordination is fairly well developed and overall coordination will continue to improve.
- some aspects of fitness will be near equal between the sexes.
- females tend to mature earlier than males, but as males mature they may become stronger, faster and larger than the typical female.
- students tend to tire easily but endurance continues to improve as heart and lung sizes increase.

#### b) Mental Characteristics

- attention span is increasing and students are becoming more capable of understanding abstract concepts and learning more complex skills. They use logical reasoning based on classifying and ordering.
- students enjoy working with things and like to determine why and how things work.
- students enjoy a challenge and become keenly competitive in both individual and team situations.
- students are interested in practising and mastering skills and are generally enthusiastic and highly motivated.
- students develop an awareness of social concerns and strive for independence.
- students begin to accept responsibility for their actions and are more capable of making their own decisions.

---

1. Adapted from *Physical Education: A Program for all Seasons, Physical Education of Idaho Public Schools, Grades 7 - 12*, Idaho State Department of Education, Division of Instructional Improvement, January 1982.

### c) Social and Emotional Characteristics

- students seek acknowledgement and need encouragement and reassurance
- peers play an ever-increasing role of importance and peer group loyalties are evident.
- permanent friendships are also evident and students have a strong need to "belong".
- emotions are difficult to control and run to extremes. Attitudes may fluctuate.
- students are becoming interested in the opposite sex and are more concerned about their personal appearance and hygiene.

### d) Program Implications of Growth Characteristics

Rapid muscular development, accompanied by periodic stages of awkwardness and poor coordination, means that junior high students may exhibit widely varied abilities.

#### Growth Characteristic

#### Program Implication

##### (1) Growth spurt

Regular physical activity should be provided to enhance normal growth, and information about physical changes taking place should be presented.

## 2. Senior High

### a) Physical Characteristics

- most students will outgrow their "awkward" stage as they approach maturity during their high school years.
- they will experience significant gains in weight, strength, and both cardiovascular and muscular endurance.
- fine and gross motor coordination and muscular control are greatly enhanced.
- females typically do not maintain physical activity and will begin to experience a decrease in strength and flexibility unless activity is maintained.
- females tend to reach maturity earlier than males.
- males are capable of attaining higher fitness and physical performance scores than females in most aspects of fitness.

### b) Mental Characteristics

- students now have a longer attention span and are able to concentrate for greater periods of time.
- a greater interest is shown in intellectual and aesthetic pursuits.
- a concern for their successes and failures is apparent as they are looking toward their future and as they begin to relate to immediate and long-range goals.
- abstract reasoning is developing.
- mental abilities are developing and students require more exposure and varied experiences to function in society.

### c) Social and Emotional Characteristics

- peers have a strong influence on an individual during this period of life; peer group loyalties are very strong, as is the need to "belong".
- students strive for and demand greater independence and may resent controls placed upon them.

- most students are responsive to the needs of others and are aware of and sensitive to the opposite sex.
- personal appearance and hygiene are of great importance.
- many students are striving for a personal identity.

#### d) Program Implications of Growth Characteristics

The patterns of growth and development vary greatly between male and female students in high school. Motor coordination and strength will improve for both sexes. Students will become increasingly aware of interests in their personal development and appearance as their adult drives become stronger.

Characteristics	Program Implications
(1) Personal appearance paramount	The beneficial results of regular physical activity on appearance should be emphasized.
(2) Weight gain, growth nearing completion	Continued regular physical activity to enhance growth and development should be encouraged.
(3) Need for more autonomy of self	Experiences that permit students to make decisions should be provided.
(4) Increased sexual awareness	Co-educational activities should be encouraged.
(5) "Peer Power"	Success in front of the group should be ensured.

## B. SHORT- AND LONG-TERM PLANNING

### 1. Yearly Planning

Yearly planning is essential to the development of a quality physical education program. It is a decision-making process that should involve all members of the physical education staff.

Many factors such as student abilities, facilities (school and community), equipment, staff, budget, transportation and program philosophy affect yearly planning. Because of the variety of factors that can influence program planning, no set program can serve all physical education situations equally well. Each physical education staff should therefore go through the planning process, referring to the guidelines and recommendations of the provincial curriculum, to create a program that is best suited to the particular needs of their students and school.

This planning process involves defining and/or developing the following areas:

- school profile
- program philosophy
- aims and objectives
- scope and sequence of activities
- program balance
- scheduling

- student evaluation
- program evaluation

## 2. Unit Planning

Unit plans provide a comprehensive outline of how a particular activity will be taught and its specific contributions to overall program objectives. The unit plan should consist of four main components: specific objectives, learning activities, student and unit evaluation techniques, and resources.

## 3. Lesson Planning

The lesson plan should provide a proposal for the organization and management of time, space, equipment, learning activities and students to be taught, in order to maximize the attainment of lesson, unit and program objectives. It should be a flexible rather than rigid guide in order to accommodate spontaneous teaching and learning opportunities.

All phases of program planning are addressed in the secondary physical education in-service package available from ACCESS NETWORK (see page 193).

# C. TEACHING METHODS AND STRATEGIES

## 1. Teaching Methods

The variety of student abilities and the breadth of concepts, skills, and attitudes learned in physical education suggest that teachers should practise an array of teaching approaches. An effective teacher of physical education has a repertoire of methods and uses them in specific situations, depending upon desired learner outcomes, subject matter, the nature of the learners and their stage of learning, the number in the class, and the particular needs of the moment.

Current literature suggests an array of teaching methods. The most prevalent physical education teaching model was developed by M. Mosston and is based on the axiom that "teaching behaviour is a chain of decision-making".<sup>1</sup> Mosston's model is represented by a continuum of teaching methods. At one end of the curriculum, all decisions are made by the teacher. Moving along the continuum, different teaching methods evolve which encourage the transference of decision making from teacher to learner. These are termed indirect or student-centred teaching methods. Ultimately, the learner is making all the decisions while the teacher acts as a resource person. Mosston's continuum is as follows:

- (1) The **COMMAND METHOD** requires the teacher to make all decisions while the learner obeys and responds.
- (2) The **PRACTICE METHOD** allows the learners to make some decisions associated with what they are doing. Students might select the task itself or choose the best area for practice.
- (3) The **RECIPROCAL** or **PAIRS METHOD** requires learners to work with a partner. One student acts as the doer while the other provides feedback using prescribed criteria set by the teacher.

---

1. Mosston, M., and S. Ashworth, *Teaching Physical Education*, Columbus, Ohio: Merrill Publishing Co., 1985.

- (4) The SELF-CHECK METHOD provides students with the opportunity to respond to the challenge of working on their own while following a checklist of activities designed by the teacher. It allows them to evaluate themselves and progress at their own pace.
- (5) The INCLUSION METHOD introduces multiple levels of performance into the same task. Students select the point where they will begin the task and the level of performance for which they will try.
- (6) The GUIDED-DISCOVERY METHOD allows each learner to respond to a sequence of teacher-prescribed tasks or questions and to discover the "whys" and "hows" of the activity in question.
- (7) The DIVERGENT METHOD encourages learners to solve problems. A problem is structured by the teacher, and learners determine as many solutions as possible. Once all alternatives have been explored, specific criteria are provided and the students determine the best solution.
- (8) The GOING-BEYOND METHOD is one in which learners devise problems and develop solutions independently. Students learning with this method would have a firm grasp of the skills required, the confidence to try variations of activities, and the ability to make their own decisions about ways to improve performance.

Used in the appropriate situations, each of these teaching methods can be valuable. Each offers different potential in helping students develop physical skills, knowledge and understandings, social skills, as well as positive attitudes and appreciations.

## 2. Teaching Strategies

- a) Separate competition from skill learning. When all skill drills are competitive, the focus is on winning, not learning, and beginners feel responsible for team losses rather than trying to improve skills.
- b) Provide as much opportunity for skill instruction and feedback as possible for students who do not have the basic skills to enjoy a game. Invite them to come early to class or return after school, assign homework, or provide extra inclass practice in addition to regular class instruction. Avoid taking on the role of referee in classes, and continue to teach during the class tournament.
- c) Use ability grouping to allow all students, beginning and advanced, to work on skills at their level, rather than boring advanced students and frustrating beginning students by teaching them all the same skills at the same time.
- d) Develop and post fair play rules for team sports. Enforce the penalties for students who violate the rules.

## D. EXCEPTIONAL STUDENTS

For the purposes of physical education, exceptional students may be defined as highly skilled, slow learners, physically disabled or deficient in their perceptual motor abilities. Since the goal of physical education is for all students (within their particular capabilities) to respond to the best of their own abilities, teachers are encouraged to assess the physical capabilities of exceptional students in order to establish a personal profile. This profile provides information for the development of an action plan specific to the exceptional students' needs for successful integration into the physical education program.

The needs of gifted and talented students can be better met by programs that provide them with opportunities to:

- i) be involved in leadership situations.
- ii) realize high level objectives within each learning domain.
- iii) become immersed in an activity or topic.
- iv) be exposed to indirect or student-centred teaching methods.
- v) be analytical and reflective.

For assistance with meeting the needs of physically disabled students, consult the monograph *Integrating Physically Disabled Students into Physical Education*, 1985 available through the Learning Resources Distributing Centre, Alberta Education.

## E. CO-EDUCATIONAL PHYSICAL EDUCATION

Each of the following areas has been the focus of research over the past decade. As a consequence, some guidelines can be derived for the effective implementation of co-educational programs.

### 1. Inherent Capabilities

Research has shown that in fitness measures, boys have more strength, height, weight, and cardiorespiratory endurance than girls. They also have a lower percentage of body fat. Girls generally possess greater flexibility, rhythmic ability and buoyancy. It is generally agreed that separate standards are needed for boys and girls in areas where any combination of strength, endurance, height, weight, lean body mass, flexibility, buoyancy or rhythm contribute to the evaluation of physical performance.

When evaluating the ability of boys and girls in fitness activities, it is important to remember that the above results represent the average for boys and girls. Too often these results are interpreted to mean that all boys are stronger than all girls, or that all girls are more flexible than boys. As teachers, it is important to keep in mind that considerable overlap in abilities often occurs.

The ability to acquire complex physical skills and to learn tactics and strategies associated with games has not been definitively linked to either gender. At present, it is acknowledged that boys have a greater opportunity to play games such as ice hockey, soccer, or football and therefore may enter physical education classes with a superior exposure to these spatial games. There is, however, no evidence at present to show that girls have an inability to acquire complex skills or that they cannot learn the tactics associated with games. The lack of evidence may be the result of problems associated with measuring the acquisition of skill or tactical sense.

### 2. Effects of Co-educational Classes

There is no evidence at present showing that co-educational physical education classes (as compared to segregated classes) affect students' attitudes toward physical education, their motivation or levels of aspiration, or that co-educational physical education classes affect the ability of either boys or girls to acquire complex skills.

There is no evidence to show that injury rates increase or decrease because of co-educational physical education. There is evidence, however, to show that girls in school sports experience injuries that are different from boys and vice versa. A recent study reported that boys experience a greater incidence of injury to their shoulder areas whereas girls experience more injuries to the knees. Boys tend to experience more

contusions, strains and fractures while girls are more prone to sprains and dislocations. The underlying reason for the difference between boys and girls is not related to anatomical or physiological differences but to the specific sport and the athlete's readiness to participate. In order to prevent injuries, conditioning programs should be provided to assist all participants to maximize their strength and endurance.

### 3. Teacher Attitude and Behaviour

Studies indicate that the attitude of the physical education teacher is an important determinant in the success of co-educational physical education classes. The following suggestions may assist the co-educational physical education instructor:

- a) Monitor and change any tendency to describe student behaviour in generalized gender terms. Avoid saying, "The boys never pass," or, "The girls always hang back." Instead, specifically identify which boys and girls engage in this behaviour.
- b) Remember that girls and boys who do not conform to traditional sex role behaviour need support, encouragement, and sometimes protection in choosing their interest and developing their abilities.
- c) Compliment and encourage students who play enthusiastically and fairly with others in the class regardless of skill or gender.
- d) Avoid the use of student gender as a criterion in grouping for instruction or game play. Instead, use skill ability, height, or other criteria relevant to the activity being taught.
- e) Use non-sex designated rule changes to encourage more game participation by less aggressive students. Instead of saying, "A girl must touch the ball before a shot is taken," try, "Everyone on the forward line must touch the ball before a shot on goal."
- f) Encourage students who lack confidence and skill in team games. Make an effort to identify students who, like invisible players, can easily be overlooked by teachers and other students in large classes.

### 4. Student Reaction to Co-educational Classes

A number of participation styles have been identified for boys and girls. Many of these styles are similar for both while others are very different. For example, in one study both boys and girls had groupings identified as highly skilled and motivated athletes. For both boys and girls, there were also the "invisible athletes", low-skilled students who actively avoided contact with the ball or involvement in the play. Unique to the boys was a group of skilled athletes called "machos" who seemed to resent the presence of the girls and tried to dominate them and the lesser skilled boys. Within the girls, two groups were unique. One group was called "femmes fatales" and were girls who appeared to dislike physical education, misbehaved and teased the other students. Another group was called "system beaters", girls who were successful in being absent from class. Although there is no evidence to show that co-ed physical education negatively affects attitude, motivation or the ability to learn, it does appear to increase the variety of participation styles that the teacher has to deal with.

Research has indicated that for boys and girls of similar skill level (skilled or unskilled), co-educational physical education provides a positive learning experience. Difficulties are more likely to appear when skill level is uneven.

Studies do suggest that co-educational sport assists boys and girls to see each other in a more realistic light. Whereas segregated sport often perpetuates the idea that all girls are less skilled and less able physically than all boys, co-educational sports tends to blur the gender lines. Since women have moved into the workplace in numbers comparable to men, many feel that experiences in physical education and sport act as experiences that help both sexes interact together more productively as adults in the workplace.

## F. DEVELOPING STUDENT LEADERSHIP

Opportunities for students to develop skills in decision making, organizing, communicating, problem solving, and group interaction should be integrated into all dimensions of the instructional, intramural and interschool programs. In addition to developing these leadership skills, carefully structured programs have the potential to develop desirable personal qualities such as self-confidence, initiative, reliability, perseverance, empathy, tolerance, understanding, and cooperation. The *Student Leadership Development Program* contains a variety of practical ideas for integrating leadership development into physical education settings. This publication is available from the Canadian Intramural and Recreation Association (333 River Road, Ottawa, Ontario, K1L 8H9).

## G. EVALUATION

### 1. Student Evaluation

The objectives presented in the Introduction (B) establish the learning goals of the program. To determine whether these objectives have been met, students' performances must be evaluated. Results of this evaluation can then be used to provide students, parents, teachers, and administrators with information regarding levels of achievement related specifically to skills, fitness, knowledge, attitudes and social development.

Student evaluation should be guided by the following principles:

- a) evaluation should be based on all the program objectives.
- b) students should be made aware of the evaluation methods to be used and may be involved in the development of the criteria.
- c) students should not be evaluated relative to how well the best student in the class performs. Rather, evaluation should be based on the degree to which all students achieve their maximum potential relative to each objective.
- d) evaluation should foster a positive student attitude toward physical education.

A recommended range of weightings for each reporting period is as follows:

a) development and application of physical skills.	20-40%
b) development and maintenance of physical fitness.	15-25%
c) development of knowledge and understanding.	15-25%
d) development and maintenance of positive attitudes and social skills.	<u>20-40%</u>
Overall Mark to Total	<u>100%</u>

Accurate assessment of student progress should be a part of the educational process. This can only be accomplished if the evaluation system has been clearly outlined. Once the objectives have been stated and the program formulated and carried out, there are means to determine whether these objectives have been met. The secondary physical education inservice package available from ACCESS NETWORK and the *Secondary Physical Education Student Evaluation Monograph*, 1988 developed by Alberta Education and available through the Learning Resources Distributing Centre will assist in determining the evaluation means most suitable for various programs.

## 2. Program Evaluation

Regular ongoing evaluation of physical education programs can provide insight into program needs, facilitate planning and provide a basis for setting and revising objectives. Program evaluation should provide information relative to:

- a) the program's contribution to individual student's interests and needs.
- b) the program's contribution to the development of physical fitness, motor skills, knowledge, personal attributes and social skills.
- c) the extent to which administrative organization is meeting objectives.

This topic is addressed in detail in the secondary physical education inservice package available from ACCESS NETWORK.

## ADMINISTRATIVE CONSIDERATIONS

### A. FACILITIES

The gymnasium is the primary facility where physical activity will be carried out. This facility should have proper floor markings, be free of safety and health hazards, have a ceiling at least 6.7 m high, and be large enough to enable the school to schedule physical education for the minimum required time per week, per pupil. The gymnasium and auxiliary indoor teaching stations are not the only places where physical activity can occur. Usable areas within the school may include hallways and classrooms.

School grounds should be large enough to provide space for a variety of activities. They should be properly surfaced, graded, drained, enclosed and free of safety hazards.

Where possible, community facilities such as tennis courts, pools, and rinks should also be used. In many communities there is a joint-use agreement between the school and the community for use of such facilities. Other community facilities often available are curling rinks, bowling alleys and golf courses. The use of such facilities can enhance the scope of a program.

More detailed information on facilities may be obtained from the publication *A Guide to Planning of Physical Education Facilities in Alberta Schools, 1979* (revised edition), Health and Physical Education Council of the Alberta Teachers' Association, Edmonton.

### B. EQUIPMENT

The selection and purchase of equipment is an important task. The amount and type of equipment made available is often determined by the age and number of students, size and type of facilities, program content and funds available in any given school. When selecting and purchasing equipment, the following considerations should be made:

- a) The basic needs of the instructional program should be considered first; then consideration should be given to the purchase of extra equipment for use in the intramural and interschool program.
- b) Price alone should not be the determining factor for purchasing equipment. Protection, safety, durability, performance and maintenance factors should be considered.
- c) School jurisdictions may consider establishing a central loan pool to provide more costly pieces of equipment.

### C. BUDGET

Fiscal planning is an essential part of all physical education programs. The budget should reflect program objectives and priorities. Two types of budget planning need to be done:

- a) short term – This is often referred to as the operational or yearly budget. It contains such things as equipment, facility rental, transportation, equipment repairs and textbooks. Equipment purchased in the operational budget is usually expendable (balls, nets, etc.); high cost items such as gymnastic equipment are often purchased through a capital equipment budget.
- b) long term – Long-range planning, although often overlooked, is all-important for establishing priorities. Such planning simplifies the establishment of priorities when

purchasing equipment, especially major capital items; influences school philosophies; and helps determine what areas of the program need to be developed.

## **D. FEE ASSESSMENT**

Since physical education is a required subject for all students in grades 1 to 10, it should not discriminate between students on the basis of ability and/or willingness to pay extra fees in order to participate.

In establishing a plan of activities, areas of expenditure that may exist should be kept in mind. Areas often requiring extra expenses include:

- a) lock/locker rental
- b) insurance coverage
- c) "lab" fees – standard fees charged to all students at the beginning of a school year or charged on an individual activity basis, or a combination of both.
  - such fees in most cases involve off-school sites and include:
    - i) facility rental
    - ii) special equipment rental or purchase
    - iii) hiring of qualified personnel
    - iv) transportation.

## **E. INTRAMURAL AND INTERSCHOOL PROGRAMS**

Intramural and interschool programs offered within a school are an important component of the total education of the student. These programs are offered outside of but are complementary to the regular curriculum; e.g., lunch time, after school, and weekends. Intramural and interschool programs complement the physical education program by further developing the skills, knowledge and positive attitudes developed in the instructional program.

Intramural programs should provide all students with opportunities to participate. A quality intramural program includes leagues and tournaments, special days, clubs, and self-directed activities. A suggested resource is the *CIRA Intramural Series* available from the Canadian Intramural and Recreational Association (333 River Road, Ottawa, Ontario, K1L 8H9).

Interschool activities consist of competition with other schools. Organization and governance of interschool programs at the junior high level differ in districts across Alberta. Provincial competition at the senior high level in a variety of activities is governed by the Alberta Schools Athletic Association (ASAA).

Students, teachers and schools have a choice in relation to providing for and participating in intramural and interschool programs. Schools should analyze their needs and the needs of the students as well as those of the community, and decide whether intramural and interschool programs should be made available as part of each student's education. If they are, the total school teaching staff should be responsible for the organization and supervision required.

## **F. LEGAL LIABILITY AND SAFETY CONSIDERATIONS**

### **1. Legal Liability**

Physical educators have become increasingly concerned about legal liability resulting from injuries which may occur while students are participating in physical education programs. Legal liability is dependent upon the existence of three elements.

- i) There must be a duty or standard of care owing. Physical educators have such a duty of care imposed upon them because they are entrusted with the care of students.
- ii) There must be a breach of the duty or standard of care. The standard of care expected of physical education teachers is that of a "careful parent". They are expected to employ the same amount of caution that careful or prudent parents would in the care of their own children.
- iii) There must be damage which results from the breach of the duty of care. Recognized legal damage would be physical injury, economic losses, or possibly nervous shock. There must be a connection between the damage or injury and the negligent act of the teacher.

Because there is an inherent risk of injury in most physical education settings, physical educators must be careful not to breach the standard of care owed to their students. It is only if a student is injured while exposed to an unreasonable risk that physical educators can be considered negligent. Physical educators who can answer affirmatively to each of the following questions are unlikely to be operating in a manner that could be considered negligent.

- i) Is the activity suitable to the age, mental and physical condition of the participants?
- ii) Have the participants been progressively taught and coached to perform the activity properly and to avoid the dangers inherent in the activity?
- iii) Is the equipment adequate and suitably arranged?
- iv) Is the activity being supervised properly for the inherent danger that is involved?

There are two additional concerns worthy of note for physical educators. (1) Improper first aid treatment could give rise to liability for any harm caused. However, failure to apply first aid in an appropriate situation could also be considered negligent. In Alberta, the Emergency Medical Aid Act, RSA, 1980, Chapter E-9, protects a person who voluntarily provides emergency first aid assistance at the scene of an accident from legal action for injuries or death unless it is established that the injuries or death were caused by gross negligence. This is commonly called Good Samaritan legislation, and would protect physical education teachers who provide first aid under emergency conditions. (2) The use of private vehicles to transport students to extracurricular activities can be problematic. School sponsored activities are covered by the liability insurance carried by the school board. Physical education instructors must rely upon their personal liability insurance for activities that are not school sponsored.

Normally, if physical educators are acting in the course of their employment, the school board will be vicariously liable and should be insured against any losses arising from legal action being taken as the result of a physical education accident.

## 2. Safe Learning Environment

Because of its nature, there will always be some risk of accidental injury associated with physical education. The school and teacher are responsible for minimizing the possibility of mishaps occurring. This can best be accomplished by providing a safe learning environment. Such an environment can be established and maintained by ensuring that:

- a) all students change from their regular school clothing to physical education attire that facilitates freedom of movement and promotes safety. Jewelry should be removed to avoid injury to self and others.

- b) facilities and equipment are in good working order and appropriate for the activity.
- c) sound teaching/learning progressions that consider the readiness of the students and teacher qualifications (expertise, experience, etc.) are used.
- d) supervision is carried out in a manner suitable to the occasion.
- e) students are well aware of safety rules.

### 3. Accident Procedures

All school boards should have an accident policy on record. Each school administration should have a set of school safety rules, first aid kit, and forms to be used by teachers when reporting accidents. The physical education teacher should be familiar with these safety rules, accident reporting forms, and first aid procedures. Teachers should also check the insurance coverage held by their board for activities that are not listed in the curriculum guide.

Wayne A. Mackay's book *Education Law in Canada* (Edmond-Montgomery Publications Limited, 1984), Chapter 5, provides a comprehensive discussion of the legal liability of physical education instructors. The following book also provides useful liability reference: *Sport, Physical Activity and the Law*, Raymond Brown, Dick Moriarty, Marge Prpich. Canadian Association for Health, Physical Education and Recreation, 1984. Government of Canada, Fitness and Amateur Sports.

## SCOPE AND SEQUENCE OF ACTIVITIES

### A. PRINCIPLES

The following principles underlay the development of the scope and sequence for the activities in the various dimensions.

1. Students mature and develop at different rates.
2. Students vary in ability (e.g., intellectual, motor-perceptual abilities).
3. Students learn at different rates.
4. Students learn in different ways.
5. Students should be challenged to learn to their potential.
6. Student ability to function in more socially complex situations usually improves as the student matures.
7. It is feasible to adjust instructional and learning processes to student background, abilities, interests and learning styles within the context of group instruction.
8. Skills should be taught progressively, from simple to more complex.
9. Skills should be taught as whole actions, and only broken down into partial motions if necessary.

### B. PROGRESSIONS

The progressions of the activities that follow are sequentially developed continua of skills. Each progression has been organized into four levels. Each level may serve as a stage to introduce and develop some of the necessary skills. Subsequent levels should reinforce existing skills, knowledge, and appreciations. Although the progressions are generally presented as psychomotor skills, it is intended that they be integrated with cognitive and affective components. In addition to performing skills, participants should be able to analyze, make appropriate corrections to and display positive attitudes and appreciations toward activities being studied.

The following should be noted about the progressions and suggested levels.

1. Neither the progressions nor levels are intended to be prescribed programs. Rather, it is hoped they will serve as guides for teachers in the modification and development of programs tailored to their individual circumstances.
2. The levels suggested should not be tied to grade levels as they merely represent a suggested sequence. Activity instruction normally begins with simple activities and progresses to the more complex. Starting points and progressions are, however, dependent upon individual participants and are not necessarily determined by grade level. Natural ability and skills gained from previous learning experiences both in and out of school need to be assessed in order to develop a program based upon students' needs.
3. Teachers are encouraged to use the suggested progressions and levels to suit best the needs of their students. For example, all of a particular level need not be covered when it

is introduced. Skills can be added, deleted, or moved freely from one level to another when program or student circumstances warrant such action, or a number of levels can be offered simultaneously to different students in the same class.

4. Care should be taken to ensure that elementary, junior high and senior high school programs articulate with each other.
5. Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## AQUATICS DIMENSION LEARNER OUTCOMES

Aquatics emphasize the use of a unique environment to promote the safe pursuit of water-related activities. Activities included are: diving, lifesaving, skin diving, swimming, synchronized swimming, water games, and water safety.

Aquatics is considered a vital dimension of a well-planned physical education program. A minimum of at least one exposure to a water and water safety program is suggested during the secondary years. Decisions as to when that experience should occur will depend upon the time needed, the availability of a facility, qualified personnel, and transportation.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the aquatics dimension. Acknowledging individual differences, each student will develop:

- |     |   |
|-----|---|
| P/A | 1. the ability to feel comfortable and confident in the water while displaying principles of buoyancy, propulsion techniques, water entries, and drownproofing skills;  |
| P   | 2. the ability to swim a variety of distances and to take part in selected water games and sports;  |
| P   | 3. muscular strength and total fitness through participation in water activities;   |
| C   | 4. an understanding of safety and lifesaving skills associated with water activities;   |
| P/C | 5. the ability to use self-rescue skills and to assist persons in danger on, in or near water;  |
| P/C | 6. the ability to identify and participate in a variety of vigorous fitness-inducing activities that relate to or complement selected aquatic activities;               |
| C   | 7. an understanding of the origin and history of water activities and the terminology, mechanical principles and current developments associated with water activities; |
| A   | 8. an appreciation of and respect for the water environment; and  |
| A   | 9. an appreciation of the unique contribution of aquatics to personal fitness and to safety in lifetime water-related activities.                                       |

The dimension of aquatics may be exempted by a school if a facility is not accessible. This should be noted under special circumstances on the Secondary School Program Plan.

# DANCE

Folk Dance .....	42
Modern Dance .....	46
Jazz Dance .....	48
Social and Ballroom Dance .....	51
Square Dance .....	53

Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## DANCE DIMENSION LEARNER OUTCOMES

Dance emphasizes the expressive aspect of movement. Activities included are: folk dance, modern dance, jazz, social and ballroom dance, and square dance.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the dance dimension. Acknowledging individual differences, each student will develop:

- |     |     |   |
|-----|-----|---|
| P   | 1.  | body awareness, space awareness, and quality of movement associated with one or more of folk, social, square, modern, or jazz dance;  |
| P/C | 2.  | the ability to create and perform individual, partner and/or group dance compositions in one or more dance forms with or without music;   |
| P   | 3.  | the individual physical capacity to perform dances of a vigorous nature that have the potential to contribute to total fitness;   |
| P/C | 4.  | the ability to identify and participate in a variety of vigorous fitness-inducing activities that relate to or complement selected dance activities;                            |
| P   | 5.  | the ability to participate in vigorous physical activities to music;  |
| C   | 6.  | an understanding of the origin and history of dance forms and the etiquette, terminology, mechanical principles and current developments in dance;                              |
| C   | 7.  | an ability to analyze the various elements of rhythmical movement in dance;   |
| A   | 8.  | an appreciation of the opportunities for self-expression, creativity, individual interpretation, physical fitness, and social interaction provided through various dance forms; |
| A   | 9.  | an appreciation of dance as an enjoyable lifetime activity;   |
| A   | 10. | social skills which promote acceptable standards of behaviour and positive relationships with others; and   |
| A   | 11. | a vital interest in the achievement and maintenance of one's personal fitness potential.  |

Where local conditions such as religious persuasion preclude offering the dance dimension on a school basis, this should be noted under special circumstances on the Secondary School Program Plan.

Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## FITNESS DIMENSION LEARNER OUTCOMES

Fitness develops the individual's ability to function at an optimal level and promotes understanding of the various body systems and how they are affected by physical activity. The pursuit of physical fitness is an integral part of the other six dimensions. Therefore, it should not be limited to independent units but should also be integrated into the other six dimensions. Activities included are: aerobic training, calisthenics, circuit training, first aid, fitness, posture, and weight training.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the fitness dimension. Acknowledging individual differences, each student will develop:

- |     |     |  |
|-----|-----|--|
| P   | 1.  | the ability to participate in vigorous physical activities that will enhance personal fitness development throughout the total physical education program;   |
| P/C | 2.  | the ability to assess and apply acceptable training principles in designing personal programs to improve the health related components of cardiorespiratory efficiency, muscular strength, muscular endurance, flexibility, body composition, and posture; |
| P/C | 3.  | the ability to assess and apply acceptable training principles in designing personal programs to improve the motor fitness components of agility, balance, coordination, power, reaction time, and speed;  |
| P/C | 4.  | the ability to plan, monitor and participate in a personal fitness program that demonstrates the adaptation and refinement of varying activities so they may be utilized in school, home or community settings;  |
| C   | 5.  | an understanding of the safety precautions common to fitness activities;   |
| C   | 6.  | an understanding of the history, terms, current developments in and components of functional motor fitness and the training principles, types of activities, and benefits associated with each;  |
| C   | 7.  | an understanding of the relationship of nutrition, rest, relaxation, exercise, and sports to physical fitness;   |
| C   | 8.  | a knowledge and application of the principles of first aid;  |
| A   | 9.  | an enjoyment of vigorous physical activity; and  |
| A   | 10. | a vital interest in the achievement and maintenance of one's personal fitness potential.   |

## GAMES DIMENSION LEARNER OUTCOMES

Games emphasize projecting, receiving and retaining skills, footwork, agility and body coordination, and elements of offence and defence. Games included are: badminton, basketball, broomball, curling, field hockey, floor hockey, flag football, handball, ice hockey, lacrosse, netball, racquetball, ringette, rugby, soccer, softball, squash, table tennis, team handball, tennis and volleyball.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the games dimension. Acknowledging individual differences, each student will develop:

- |     |     |   |
|-----|-----|---|
| P   | 1.  | the ability to use acquired physical skills in a wide variety of game situations;   |
| P   | 2.  | the ability to employ sound mechanical principles efficiently in the projection, reception and retention of objects under game conditions;  |
| P   | 3.  | the ability to apply acceptable team/individual and offensive/defensive concepts in the creation or elimination of personal and team space in game situations;                                    |
| P/C | 4.  | the ability to identify and participate in a variety of vigorous fitness-inducing activities that relate to or complement selected games;   |
| P   | 5.  | an understanding of the origin and history of a variety of games and of the terminology, mechanical principles, team/individual skills, strategies and techniques employed in a variety of games; |
| C   | 6.  | an understanding of rules, etiquette, and safety precautions employed in a variety of games;  |
| A   | 7.  | an appreciation of and respect for the effort, safety and abilities of oneself, teammates, opponents, officials, and instructors;   |
| A   | 8.  | an understanding and appreciation of etiquette and self-control in game situations;   |
| A   | 9.  | an appreciation of the necessity to accept leadership/followership roles in cooperative and competitive situations;   |
| A   | 10. | confidence and a desire to attempt new games or activities;   |
| A   | 11. | an appreciation of the role of games in the achievement and maintenance of one's personal fitness potential; and  |
| A   | 12. | social skills which promote acceptable standards of behaviour and positive relationships with others.   |

Tumbling .....	149

Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## GYMNASTICS DIMENSION LEARNER OUTCOMES

Gymnastics activities emphasize body management skills that develop strength, flexibility and fluency of movement. Activities included are: artistic gymnastics, dual balance, educational gymnastics, modern rhythmic gymnastics, pyramid building, rope climbing, trampoline, and tumbling.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the gymnastics dimension. Acknowledging individual differences, each student will develop:

- |     |     |  |
|-----|-----|--|
| P   | 1.  | the ability to perform ambidextrous movements that result in "balanced" body strength and mobility;  |
| P   | 2.  | the ability to demonstrate mechanical principles and motor patterns in the creation and performance of artistic/rhythmic/educational gymnastics sequences both on the floor and in formal/informal equipment arrangements; |
| P   | 3.  | correct safety techniques where individual and/or cooperative assistance is appropriate;   |
| P/C | 4.  | the ability to identify and participate in a variety of vigorous fitness-inducing activities that relate to or complement selected gymnastics activities;  |
| C   | 5.  | understanding of the origin and history of gymnastics and the etiquette, rules, terminology, safety techniques, mechanical principles and current developments that apply to gymnastics;                                   |
| C   | 6.  | an understanding of the factors of space, weight, time and flow as they apply to gymnastics;   |
| C   | 7.  | the ability to monitor improvement and set personal performance goals in gymnastics activities;  |
| C   | 8.  | the ability to design and evaluate gymnastics routines;  |
| A   | 9.  | an appreciation of and respect for the safety, efforts and abilities of oneself, teammates, opponents, officials and instructors;  |
| A   | 10. | the confidence and desire to participate willingly as a performer and/or organizer in class events;  |
| A   | 11. | perseverance, self-confidence, and individual initiative; and  |
| A   | 12. | an appreciation of the role of gymnastics in the achievement and maintenance of one's personal fitness potential.  |

Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## INDIVIDUAL ACTIVITIES DIMENSION LEARNER OUTCOMES

Individual Activities are those which by their nature can be pursued by an individual with or without a partner or opponent. Activities included are: archery, cross-country running, five-pin bowling, ten-pin bowling, golf, track and field, weightlifting, and wrestling.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the individual activities dimension. Acknowledging individual differences, each student will develop:

- |     |    |  |
|-----|----|--|
| P   | 1. | the basic skills, techniques, and form associated with selected individual activities;   |
| P   | 2. | the ability to use acquired physical skills in a wide variety of individual activities;  |
| P/C | 3. | the ability to identify and participate in a variety of fitness-inducing activities that relate to or complement selected individual activities;   |
| C   | 4. | understanding of the origin and history of various individual activities and the etiquette, rules, terminology, safety concepts, mechanical principles and current developments that apply to various individual activities; |
| C   | 5. | the ability to monitor improvement and set personal goals in various individual activities;  |
| A   | 6. | an appreciation of and respect for the safety, effort, and abilities of oneself, partners, opponents, officials, and instructors;  |
| A   | 7. | confidence and a desire to attempt new individual activities;  |
| A   | 8. | increased self-confidence, self-sufficiency, and individual initiative; and  |
| A   | 9. | an appreciation of the role of individual activities in the achievement and maintenance of one's personal fitness potential.   |

# OUTDOOR PURSUITS

Alpine Skiing (Downhill) .....	172
Backpacking/Hiking .....	174
Camping .....	176
Canoeing .....	177
Cycling .....	180
Nordic Skiing (Cross-Country) .....	182
Orienteering .....	184
Sailing .....	186
Skating .....	187
Snowshoeing .....	189
Wilderness Living .....	190

Further expansion of the scope and sequence beyond level four, and the addition of activities to the program that are not included in the curriculum guide, are subject to board approval.

## OUTDOOR PURSUITS DIMENSION LEARNER OUTCOMES

Outdoor Pursuits emphasize physical activities requiring wise and careful use of the natural environment. Activities included are: alpine skiing (downhill), backpacking/hiking, camping, canoeing, cycling, Nordic skiing (cross-country), orienteering, sailing, skating, snowshoeing, and wilderness living skills.

Each dimension provides psychomotor (P), cognitive (C), and affective (A) development. The following outcomes identify the knowledge, attitudes, and physical and social skills related to the outdoor pursuits dimension. Acknowledging individual differences, each student will develop:

- |     |    |  |
|-----|----|--|
| P   | 1. | the basic skills, techniques, and form associated with one or more outdoor activity;   |
| P/C | 2. | the ability to identify and pursue a variety of fitness-inducing activities that relate to or complement selected outdoor pursuits;  |
| C   | 3. | an understanding of the origin and history of outdoor pursuits and the terminology, rules, safety concepts, mechanical principles and current developments that apply to outdoor pursuits; |
| A   | 4. | an appreciation and respect for the natural environment;   |
| A   | 5. | an awareness of the potential of the natural environment for worthwhile lifetime outdoor pursuits in all seasons;  |
| A   | 6. | social skills that promote acceptable standards of behaviour and positive relationships with others;   |
| A   | 7. | increased self-confidence, self-sufficiency, and individual initiative; and  |
| P   | 8. | an appreciation of the role of outdoor pursuits in the achievement and maintenance of one's personal fitness potential.  |

## APPENDICES

### LEARNING RESOURCES

**Basic learning resources** are those learning resources approved by Alberta Education as the most appropriate for meeting the majority of goals and objectives of courses, or substantial components of courses outlined in the provincial programs of studies. No basic texts have been designated for the secondary physical education program.

**Recommended learning resources** are those learning resources approved by Alberta Education because they complement basic learning resources by making an important contribution to the attainment of one or more of the major goals of courses outlined in the provincial programs of studies.

Recommended print learning resources and records may be purchased from the Learning Resources Distributing Centre of Alberta Education. All recommended video learning resources may be obtained from ACCESS NETWORK.

**Supplementary learning resources** are those learning resources approved by Alberta Education because they support courses outlined in the provincial programs of studies by enriching or reinforcing the learning experience. The publishers and distributors have been identified to facilitate ordering but it is recommended that each title be reviewed before it is purchased.

The recommended and supplementary learning resources listed in Appendices A and B apply to the level of skill of the student, rather than to grade level.

The following physical education internal materials are available from ACCESS NETWORK:

#### Videotapes:

264001	Dimensions of Success
264002	Action Planning
264003	Teaching Methods
264004	Management and Organization
264005	Evaluation
264006	Fitness
264007	Dance
264008	Gymnastics
264009	Games

#### Print Support:

Secondary Physical Education Inservice Manual  
"Our Physical Education Program" (wall chart)

The support documents *Secondary Physical Education Student Evaluation* (1988) and *Integrating Physically Disabled Students into Physical Education* (1985) are available from the Learning Resources Distributing Centre of Alberta Education.

## APPENDIX A

### Recommended Teacher Resources

#### AQUATICS

1. Water Safety Instructor Guide and Reference: Volumes 1, 2 and 3. (Print.) Toronto: The Canadian Red Cross Society, 1983.

Provides analysis information for stroke improvement lifesaving skills, and instructional strategies. Contains many Levels 1-4 skills. Does not include games to play in the pool.

#### DANCE

1. An Introduction to the Teaching of Dance. (Print.) Elizabeth R. Hayes. New York: Robert E. Krieger Publishing, 1980.

Many suggestions and strategies for teaching modern dance. Includes some ballroom content. Does not include folk dance. For those requiring more depth of treatment. Covers Levels 1-2.

2. Ballroom Dancing. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980.

Useful beginning handbook for ballroom dance. Covers Levels 1-3 of the program.

3. Dance a While Handbook of Folk, Square, and Social Dance. 5th edition. (Print.) James A. Harris, Anne M. Pittman and Marlys S. Waller. Minneapolis: Burgess Publishing Company, 1978. Canadian Distributor: Atlantic Book Ltd., Truro, N.S.

Covers Levels 1-4 for ballroom and folk dance. Covers Levels 1-3 for square dance. Comprehensive treatment with many activities. Does not include evaluation suggestions. A first choice.

4. Debonair Dancers. (16mm film.) Allison Nigh-Strelich. Santa Barbara, California: Brooks-Strelich, 1984. Distributed in Canada by McNabb Films. Teacher inservice.

This film is appropriate for teacher inservice training and workshops. It excellently portrays the philosophy of educational dance through demonstrating how disabled and Down's syndrome persons can be taught to dance expertly and to learn concurrently social and communication skills. Running time is 25 minutes.

5. Folk Dance, Secondary. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1981.

Useful introduction to planning and teaching secondary folk dance. Covers Levels 1-4 of the program but the depth of treatment is shallow.

6. Jazz Dance. (Multimedia Kit.) Geraldine Van Gyn, and Donna Van Sant O'Neill. Victoria, British Columbia: University of Victoria, 1986.

The components include videotapes, a teacher's manual and an audiotape. Covers many Levels 1-4 skills.

7. Square Dance. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1984.

Useful for planning and organizing for instruction. Helpful to beginning teachers. Covers Levels 1-2 of the program.

## FITNESS

1. Aerobics with Fun. (Print.) Charles T. Kuntzleman and Michael and Gail McGlynn. Spring Arbor, Michigan: Arbor Press, 1982.

Useful where the school has an aerobics program. Contains useful exercises, ideas and activities. Includes circuit training.

2. Fitness for Life: An Individualized Approach. 3rd edition. (Print.) Philip E. Allsen, Joyce M. Harrison and Barbara Vance. Dubuque, Iowa: Wm. C. Brown Publishers, 1984.

Covers many of the Levels 1-4 skills for fitness and weight training. Includes a comprehensive section on nutrition and exercise. Useful for planning and presenting Division IV fitness programs.

3. Fitness for Life: Physical Education Concepts. Teacher's Edition. (Print.) Alex F. Carre, Charles Corbin and Ruth Lindsay. Toronto: Gage Publishing Ltd., 1980.

Suitable for planning and organizing junior high fitness programs. Both teacher's manual and student text are useful teacher references. Stresses the reasons why exercise and fitness are important. Contains self-evaluation strategies.

## GAMES A

1. Basketball. (Print.) Calgary Board of Education, Physical Education Department Curriculum Action Project, 1983.

Skills and progressions of skills clearly indicated. Most useful for beginning teachers. No evaluation strategies.

2. Basketball Handbook. (Print.) Physical Education Series. John Mills. Vancouver: Hancock House Publishers, 1980.

Contains skills, drills and evaluation suggestions. Has sample lesson plans and logical development of skills. Covers Levels 1, 2, and parts of Level 3 of the program.

3. Beginner's Program. (Print.) Georges Lariviere. Ottawa: Canadian Amateur Hockey Association Hockey Development Council, 1980.

This book contains skills, drills and activities useful in the teaching of skating and hockey. Also recommended for use with Outdoor Pursuits.

4. Coaching Manual Level 1. (Print.) Toronto: Federation of Broomball Association(s) of Ontario, n.d.

Contains Levels 1-4 skills.

5. Dynamic Skating. (Print.) Buck Matiowski. Ottawa: Canadian Amateur Hockey Association Hockey Development Council, 1980.

A thorough approach to teaching skating skills. Also recommended for use with Outdoor Pursuits.

6. Field Hockey. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1983

Contains useful organizational material, skills, drills, and progressions. The coverage is limited. Useful for teachers introducing this activity.

7. Field Hockey Handbook. Physical Education Series. (Print.) Jenny John. Vancouver: Hancock House Publishers, 1980.

Covers the curriculum content. Contains basic skills and drills. Clear diagrams. Evaluation strategies include affective, cognitive and psychomotor domains. Provides more depth than the Calgary Board of Education manual.

8. Manual for Coaches. (Print.) Vanier, Ontario: Canadian Rugby Union, 1981.

The manual is a binder containing a number of booklets: "Even Better Rugby", "Mini Rugby", "Small Side Games" (1980), "Back Play . . . An Introduction" (1980), and "Weight Training for Rugby Football" (1981), as well as coaching data. Has useful drills and activities. Covers some Levels 1-4 skills

9. Netball. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1979.

Contains useful information for organizing and teaching netball. Includes skills, drills and progressions. Covers the basic Levels 1-4 skills.

10. Ringette Level 1 Technical Manual. (Print.) Vanier, Ontario: Ringette Canada National Coaching Certification Program, 1982.

Comprehensive treatment which includes information on equipment, rules, planning skills and drills. Covers many Levels 1-2 skills.

11. Soccer Handbook. (Print.) Physical Education Series. David Keith. Vancouver: Hancock House Publishers, 1980.

Contains basic skills and drills. Includes evaluation strategies. Covers most of the program at each level.

12. Softball Coaching Manual Level 2. (Print.) National Softball Coaching Certification Committee. Vanier, Ontario: Canadian Amateur Softball Association, 1979.

Contains good illustrations of grip and stance, and has good diagrams. Has useful ideas and covers most Levels 1-3 skills. Some Level 4 skills are included.

13. Team Handball. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1983.

14. Touch Football Teaching Guide. (Print.) Ottawa: Canadian Amateur Football Association, 1984.

Covers many Levels 1-4 skills. Is aimed at both males and females.

15. Volleyball in the Secondary School. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1979.

More useful for junior high than senior high school. This manual contains some useful drills, skill breakdowns and teaching points. Its strengths are the easy-to-follow format and useful techniques and systems of play. Covers about 50 percent of the skills at each level.

## GAMES B

1. Badminton in the Secondary School. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1982.

Useful resource for junior high. It has a good breakdown of drills, is helpful in organizing maximum activity ratios in limited spaces and in providing drill ideas. Covers basic skills but has limited coverage of Levels 1-4 skills.

2. Teaching Squash: An Introduction. (Print.) Ottawa: Canadian Squash Raquette Association, 1980.

This book relates squash to fitness and lifetime activity. Lesson plans are included. Most Levels 1-4 skills are covered.

3. Tennis. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1984.

This well laid out manual contains clear progression information and useful activities. Many Levels 1-2 skills are covered.

4. Tennis Handbook. (Print.) Physical Education Series. Gesele Lajoie and Bob Lajoie. Vancouver: Hancock House Publishers, 1980.

This manual, developed to support the British Columbia secondary physical education program, covers most Levels 1-4 skills.

## GYMNASTICS

1. Gymnastics: A Practical Guide for Beginners. (Print.) Tony Murdock and Nik Stuart. London: Franklin Watts, 1982.

Contains useful skill development suggestions and progressions. Helpful for beginning teachers. Covers most levels and skills.

2. Men's Artistic Gymnastics Handbook. (Print.) Physical Education Series. Gerald Carr. Vancouver: Hancock House Publishers, 1981.

This teacher's manual was developed to support the British Columbia physical education curriculum. It is helpful for teachers who have only a minimal gymnastics background. Covers most Levels 1-4 skills.

3. Modern Rhythmic Gymnastics. (Print.) Jenny Bott. Wakefield, West Yorkshire, England: E.P. Sport Publishing Ltd., 1981.

Breaks down the components of rhythmic. Contains useful skills, skill breakdowns, group activities and suggestions. Includes most Levels 1-4 skills.

4. Women's Artistic Gymnastics Handbook. (Print.) Physical Education Series Elizabeth P. Danskin. Vancouver: Hancock House Publishers, 1983.

Directed to teachers rather than coaches. Covers Levels 1-4 of the program. Originally developed to support the British Columbia physical education curriculum.

## INDIVIDUAL ACTIVITIES

1. Instructor's Basic Manual of the Federation of Canadian Archers Inc. Revised Edition. (Print.) Vanier, Ontario: Federation of Canadian Archers, 1982.

Contains many Levels 1-3 skills. A section on archery programs for disabled archers is included. Class organization and planning for instruction as well as many diagrams and illustrations provide assistance to teachers unfamiliar with this sport.

2. Five-Pin Bowling. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980.

Contains basic information and useful strategies. Covers most Levels 1-4 skills. Does not include history or evaluation techniques.

3. Golf. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980.

For teachers new to golf instruction. This manual has good organizational information, useful warm-up exercises, and in-gym activities. Addresses many of the Level 1 skills

4. Ten-Pin Bowling (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980.

Contains basic activities and organizational techniques. Covers many Level 1 skills.

5. Track and Field for Secondary Schools. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1983.

Well laid out. Useful planning and activity sections. Does not contain evaluation strategies, rules or javelin activities. Covers many Levels 1-4 topics.

## OUTDOOR PURSUITS

1. A Resource Manual on Canoeing for Disabled People. (Print.) Michael Arthur and Stacy Ackroyd-Stolarz. Hyde Park, Ontario: The Canadian Recreational Canoeing Association, n.d.

2. Alpine Ski Technique. (16mm film.) Rolf Kjarenski. Produced and directed by Douglas Sinclair. Toronto: Kinetic Film Enterprises Ltd., 1980.

This film was shot in Garibaldi, B.C. and in the Laurentians. It covers many Levels 1-4 skills including lift riding, side stopping, rising from a fall, snowplow run and turn, and christies. It does not cover history or etiquette. The film is 27 minutes long.

3. Beginner's Program. (Print.) Georges Lariviere. Ottawa: Canadian Amateur Hockey Association Hockey Development Council, n.d.

This book contains skills, drills and activities useful in the teaching of skating and hockey. Also recommended for use with Games A.

4. Dynamic Skating. (Print.) Buck Matkowski. Ottawa: Canadian Amateur Hockey Association Hockey Development Council, 1980.

A thorough approach to teaching skating skills. Also recommended for use with Games A.

5. Orienteering Handbook. Level 1. (Print.) Physical Education Series. Anne Anthony. Vancouver: Hancock House Publishers, 1980.

Very useful for beginning teachers. Contains clear objectives, suggestions for activities and evaluation techniques. Covers the majority of Levels 1-4 topics but does not include Level 4 content such as alternative methods of travel, cross-country skiing, cycling, canoeing or snowshoeing.

6. Orienteering Handbook. Level 2. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980.

Goes beyond Orienteering, Level 1. Covers most Levels 1-3 topics. Does not cover Level 4 and history.

7. Outdoor Pursuits Core Program. (Print.) "Canoeing" (1980), "Fires and Stoves" (1983), "Navigation" (1984), "Nutrition" (1983), "Shelters" (1983), "Trip Planning" (1984), "Personal Equipment" (1983). Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project.

As a package, these titles more than cover most aspects of the outdoor program.

## OTHER

1. The Edge Beyond. (16mm film.) Toronto: Global Communications Ltd., 1985. Distributed by Thomas Howe Associates Ltd.

Portrayed are members of Canada's Olympic Disabled Ski Team participating in the Innsbruck Olympics. These young people are shown training at Banff. Their training regimes include both cycling and swimming long distances. Many of the skiers were disabled by cancer—one is a double amputee. They are shown skiing downhill, jumping, negotiating a slalom and racing. This 22 minute film is useful both for inservice and student viewing.

2. High School Intramurals. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1984.

3. Integrating Physically Disabled Students into Physical Education. (Print.) Edmonton: Alberta Education, 1985.

4. Junior High School Intramurals. (Print.) Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1981.

5. Teaching Physical Education. 3rd edition. (Print.) Muska Mosston and Sara Ashworth. Columbus, Ohio: Merrill Publishing Company, 1985.

## APPENDIX B

### Supplementary Resources

Supplementary resources have been identified for the following dimensions.

#### FITNESS

1. Dynamics of Fitness: The Body in Action. (Filmstrip Kit.) Pleasantville, New York: Human Relations Media, 1980.
2. Fit To Be You. (Filmstrip Kit.) Ash Hayes. Burbank, California: Walt Disney Educational Media Co., 1981.

The kit includes filmstrips on muscles, heart-lungs, and flexibility and body composition. The teacher's guide contains pretests, information on fitness activities and data which pertain to junior high school age students.

3. See How We Run. (16mm Film.) Vancouver: Spectra Media Productions, 1983. Distributed by Marlin Motion Pictures

Shows the joys, rewards and pain of running. Covers Levels 3 and 4. Suitable for Division IV. The running time is 31 minutes

#### GAMES A

1. Coaching Goalkeepers. (Print.) Kathleen Broderick and Marina van der Merwe. (Print.) Ottawa: Canadian Women's Field Hockey Association, 1981.
2. Fastball-Type Games. (Print.) Basic Skills Series. Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980. (Basic resource for elementary physical education.)
3. Focus on Soccer. (Videotape Series.) Brentford, Middlesex, England: Rank Video Library, 1977. Distributed in Canada by Omega Films.

This seven-part series is fairly comprehensive. Part 1 includes the history of the sport and basic skills. It covers Levels 1-3 of the program. Part 2 demonstrates the technique of safe goalkeeping including handling, clearing and organizing defenses. Part 3 focuses on the defender and part 4 on the mid-field player. The fifth, sixth and seventh programs deal with the winger, the striker and team work. Each program is about 25 minutes long.

4. Instructional Curling. (Film Series.) "The Game and Equipment", "Three Steps to the Slide Delivery", "Sweeping Start to Finish", "Basic Curling Strategy", "Skipping Principles and Team Responsibility." Toronto: Labatt's Brewery for Curl Canada, 1984. (Also available on videotape.) The films vary from 15 to 22 minutes.

A sixth film in the series has less fit to the Alberta program. The films are useful in demonstrating skills. Teachers should be aware that there is some alcohol advertising, particularly in films 1 and 2, through the positioning of players so that the background signs are visible. Available free on loan from the Alberta Curling Association.

5. More New Games . . . and Playful Ideas from the New Games Foundation. (Print.) Andrew Fluegelman. New York: Dolphin Books/Doubleday and Company Inc., 1981.

6. Ringette Skills Series. (16mm Film Series.) "Ringette—Goal Tending", "Ringette—Skills", and "Ringette—Skating". (Three 16mm films of a four-part film series.) Ottawa: Ringette Canada, 1981.

These films are useful for portraying necessary skills and techniques. "Ringette Skills" includes the pass, receiving, and the forehand shot. "Ringette Skating" includes the forward crossover, the backward crossover, and snowplow. Drill suggestions and progressions are also included. The three films together cover most Levels 2-4 skills. The films are 10-12 minutes in length.

7. Teaching Soccer. (Print.) Burgess Sport Teaching Series. (William Thompson.) Minneapolis, Minnesota: Burgess Publishing Company, 1980.

Has useful skills and drills and covers many Levels 1-4 skills.

8. Tournament Selection and Organization. (Print.) Sandra C. Kerelink. Edmonton: Department of Physical Education, University of Alberta, n.d.

9. Women's Power Volleyball. "Individual Offensive Skills" and "Individual Defensive Skills." (Two 16mm films.) North Palm Beach, California: The Athletic Institute, 1982. Distributed in Canada by Thomas Howe Associates.

Clear descriptions of skills and demonstrations of techniques. Covers Levels 1-3 of the program. "Individual Defensive Skills" also includes some coverage of Level 4 skills. Each film is 11 minutes long.

## **GAMES B**

1. Fundamentals of Racquetball. (16mm Film Series.) "Forehand and Backhand", "Racquetball Shots", "Racquetball Serves and Returns", "Strategies for Singles, Doubles and Cut-Throat". Palm Beach, California: Athletic Institute and the Racquetball Manufacturers Association, 1983. Distributed in Canada by Thomas Howe Associates.

These four films portray equipment, techniques and strategies. Coverage includes skills from Levels 1-4 of the program. Each film is about 10 minutes long.

2. Hand, Paddle and Racquet-Type Games. (Print.) Basic Skills Series. Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project, 1980. (Basic resource for elementary physical education.)

## **OUTDOOR PURSUITS**

1. Orienteering, Level 1. (Print.) Basic Skills Series. Calgary: Calgary Board of Education, Physical Education Department Curriculum Action Project and the Canadian Association for Health, Physical Education and Recreation, 1980.

Excellent for review or introduction. Covers all the "A" and "B" content listed under Orienteering in the curriculum guide. (Listed as a "Basic" resource in the Elementary Physical Education Curriculum Guide, 1983.)
